Dr Srishti Mishra

MBBS | MD Community Medicine

Physician | Clinical AI Product Lead | Public Health Researcher

Ahmedabad, Gujarat, India | srshtm97@gmail.com | www.drsrishti.in

Professional summary

Physician and clinical AI product lead combining frontline patient care, public-health research and 18 months of digital-health product development. Led the clinical design of Saptrishi Medical AI from concept to production with engineers and a psychologist. Brings experience in clinical AI evaluation, personalised follow-up and research across older-adult and women's health populations. Four published papers and four accepted manuscripts.

Core skills

Clinical product development | AI evaluation | Cross-functional collaboration | Longitudinal health monitoring | Epidemiology and biostatistics | Behavioural and social determinants of health

Clinical AI and digital health experience

Saptrishi Medical AI

Clinical product lead | 18 months, ongoing

- Originated the clinical product concept and led its development into a production workflow, partnering with engineers and a psychologist on report interpretation, personalised guidance and follow-up.
- Defined how laboratory reports, ECGs, treadmill tests and spirometry become a longitudinal health profile, connecting clinical findings with medication history, behavioural context and care priorities.
- Led clinical review of AI outputs against source records. Translated errors in transcription, artefact handling and interpretation into product requirements and clinician-review checkpoints.
- Established sleep-wellness follow-up with psychological guidance and Google Health/Fitbit monitoring of sleep, activity, heart rate and restlessness. Documented a 23.2% reduction in mean device-recorded restlessness across 33 baseline and 20 follow-up nights in an individual case.
- Tracked cardiometabolic progress through serial clinical reports: case-level HbA1c declined from 6.90% to 5.80% (Jan-Jul 2026); treadmill workload reached a documented peak of 9.6 METs (Nov 2025), compared with an initial 5.6 METs (Apr 2024).
- Followed a separate asthma case reporting walking 2 km without breathlessness; reviewed medication use and tolerability alongside functional progress and personalised guidance.

Non-invasive haemoglobin estimation

Clinical evaluation lead | Exploratory feasibility study

Led clinical development and feasibility testing of an experimental non-invasive approach to haemoglobin estimation using lip- and tongue-image biomarkers. Evaluated 79 paired observations, including gynaecology-sourced samples, using patient-grouped validation and capture-day testing. Designed a prospective 150-adult study to compare estimates with same-day blood counts and assess performance across demographic groups, advancing the project towards evaluation for early anaemia screening.

Population health research

- Contributed to research involving 380 older adults with chronic illness, examining healthcare use, follow-up and financial burden.
- Co-authored research involving 102 postmenopausal women in rural and urban settings, alongside qualitative work on post-pandemic healthcare-seeking behaviour.

Professional experience

Senior Resident in Community Medicine | Oct 2026 - Present
SBKS MIRC, Sumandeep Vidyapeeth

- Supports field-practice supervision, clinical teaching, research, and public health programmes.

Junior Resident in Community Medicine | Oct 2023 - Oct 2026
SBKS MIRC, Sumandeep Vidyapeeth

- Combined rural, urban, and district patient care with epidemiology, biostatistics, and research; contributed household assessment, counselling, and follow-up through the Family Adoption Programme.

Clinical Doctor and Medical Officer | Aug 2022 - Aug 2023
Sterling Hospital, Gurukul, Ahmedabad

- Provided clinical care, documentation, patient coordination, and emergency-response support within multidisciplinary teams.

Rotatory Intern | May 2021 - May 2022
JSS Medical College, Mysore

- Completed hospital and community rotations, including adult medicine, paediatrics, emergency care, and COVID-19 care.

Education

MD Community Medicine | SBKS MIRC, Sumandeep Vidyapeeth | Oct 2023 - Oct 2026
MBBS | JSS Medical College, Mysore | Sep 2016 - May 2022

Relevant training

3rd Winter Epidemiology School, AIIMS Nagpur: regression analysis and quantitative bias analysis. Basic Course in Biomedical Research (BCBR).

Selected publications

Co-author of the following work. Published and accepted status shown for each.

1. Healthcare utilisation, routine healthcare follow-up, and financial burden among older adults with chronic illness in western India. *Clinical Epidemiology and Global Health. 2026;42:102486. Published.* doi:10.1016/j.cegh.2026.102486

2. Perceived changes in health-seeking behaviour following the COVID-19 pandemic: A qualitative study of urban and rural populations in eastern Gujarat. *Cureus. 2026;18(10):e117837. Published.* doi:10.7759/cureus.117837

3. Healthcare-seeking behavior and associated factors among postmenopausal women in rural and urban areas of eastern Gujarat: A community-based study. *Journal of Mid-life Health. 2026. Accepted.* doi:10.4103/jmh.jmh_121_26

4. Geriatric health care in rural setting: A community-based case report of an older adult with hypertension. *International Journal of Community Medicine and Public Health. Accepted 27 Apr 2026.*
