Dr Srishti Mishra

MBBS | MD Community Medicine

Clinical AI Product Lead | Whole-Person Health | Public Health Research

Ahmedabad, Gujarat, India | srshtm97@gmail.com | www.drsrishti.in

Professional summary

MD Community Medicine physician with patient-care experience since 2021 and 18 months leading clinical development of Saptrishi Medical AI. Partners with engineers and a psychologist to integrate physical health, behavioural context and longitudinal monitoring into personalised digital-health workflows. Research spans older adults, women's health and rural-urban healthcare access. Four published papers and four accepted manuscripts.

Core skills

Clinical product development | AI evaluation | Behavioural and social determinants of health | Wearable health data | Epidemiology and biostatistics | Cross-functional collaboration

Clinical AI and digital health experience

Saptrishi Medical AI

Clinical product lead | 18 months, ongoing

- Led clinical design from concept to production with engineers and a psychologist. Translated patient-care needs into requirements for health-report digitisation, laboratory and ECG/TMT interpretation, and personalised lifestyle guidance.
- Integrated psychological guidance, sleep wellness and physical-health monitoring. Combined clinical records with Google Health/Fitbit data to assess longitudinal trajectories and inform follow-up.

Clinical AI evaluation and interpretable cardiac modelling

- Defined the clinical interpretation framework for ECG/TMT data: heart-rate recovery, rate-pressure product and estimated exercise capacity, calculated from extracted measurements using explicit, reference-based equations.
- Specified source-page traceability, units and calibration checks so calculations could be inspected and reproduced. Defined artefact flags and clinician-review checkpoints; collaborated with engineers on automated verification of deterministic calculations using controlled inputs.

Longitudinal monitoring in practice

- Applied the workflow to individual cardiometabolic follow-up, tracking HbA1c from 6.9% to 5.8% (Jan-Jul 2026) and reviewing report-estimated treadmill workload, including 9.6 METs recorded in Nov 2025.
- Tracked a 23.2% reduction in mean device-recorded restlessness across 33 baseline and 20 follow-up nights in an individual sleep-wellness case. In respiratory follow-up, documented patient-reported tolerance of a 2 km brisk walk without breathlessness following breathing and graded-activity guidance.

Non-invasive haemoglobin estimation

Clinical evaluation lead | Exploratory feasibility study

- Led clinical feasibility evaluation of lip- and tongue-image biomarkers for non-invasive haemoglobin estimation using 79 paired observations, including gynaecology-sourced samples. Applied patient-grouped validation and capture-day testing.
- Designed a prospective 150-adult evaluation protocol comparing image-based estimates with same-day blood counts, with planned assessment of screening performance across demographic groups.

Professional experience

Senior Resident in Community Medicine | Oct 2026 - Present
SBKS MIRC, Sumandeep Vidyapeeth

- Supports field-practice supervision, clinical teaching, research, and public health programmes.

Junior Resident in Community Medicine | Oct 2023 - Oct 2026
SBKS MIRC, Sumandeep Vidyapeeth

- Combined rural, urban and district patient care with epidemiology and research. Conducted household assessment, counselling and follow-up through the Family Adoption Programme, bringing social and family context into care.

Clinical Doctor and Medical Officer | Aug 2022 - Aug 2023
Sterling Hospital, Gurukul, Ahmedabad

- Provided clinical care, documentation, patient coordination, and emergency-response support within multidisciplinary teams.

Rotatory Intern | May 2021 - May 2022
JSS Medical College, Mysore

- Completed hospital and community rotations, including adult medicine, paediatrics, emergency care, and COVID-19 care.

Education

MD Community Medicine | SBKS MIRC, Sumandeep Vidyapeeth | Oct 2023 - Oct 2026
MBBS | JSS Medical College, Mysore | Sep 2016 - May 2022

Relevant training

3rd Winter Epidemiology School, AIIMS Nagpur: regression analysis and quantitative bias analysis. Basic Course in Biomedical Research (BCBR).

Population health and human context

- Researched healthcare use, continuity of follow-up and financial burden among 380 older adults with chronic illness, examining practical barriers to sustained care.
- Co-authored research with 102 postmenopausal women across rural and urban settings, and qualitative research on post-pandemic healthcare-seeking behaviour.

Selected publications

Co-author of the following work. Published and accepted status shown for each.

1. Healthcare utilisation, routine healthcare follow-up, and financial burden among older adults with chronic illness in western India. *Clinical Epidemiology and Global Health. 2026;42:102486. Published.* doi:10.1016/j.cegh.2026.102486

2. Perceived changes in health-seeking behaviour following the COVID-19 pandemic: A qualitative study of urban and rural populations in eastern Gujarat. *Cureus. 2026;18(10):e117837. Published.* doi:10.7759/cureus.117837

3. Healthcare-seeking behavior and associated factors among postmenopausal women in rural and urban areas of eastern Gujarat: A community-based study. *Journal of Mid-life Health. 2026. Accepted.* doi:10.4103/jmh.jmh_121_26

4. Geriatric health care in rural setting: A community-based case report of an older adult with hypertension. *International Journal of Community Medicine and Public Health. Accepted 27 Apr 2026.*
