Dr Srishti Mishra

MBBS | MD Community Medicine

Community Medicine Physician | Clinical AI and Digital Health | Epidemiology

Ahmedabad, Gujarat, India | srshtm97@gmail.com | www.drsrishti.in

Professional summary

MD Community Medicine physician with patient-care experience since 2021 and 18 months of clinical AI product-development and evaluation experience with Saptrishi Medical AI. Applies clinical evidence, epidemiology, behavioural context, and social determinants of health to product requirements, longitudinal health-record interpretation, output validation, and human-in-the-loop review. Research includes older adults with chronic illness, healthcare-seeking behaviour, and geriatric care. Four published papers and four accepted manuscripts.

Core skills

Clinical AI product evaluation; model-output validation; clinical product requirements; human-in-the-loop review; error and artefact analysis; clinical safety boundaries; longitudinal health data; epidemiology and biostatistics; qualitative research; social determinants of health; data curation and validation; patient communication.

Clinical AI and digital health experience

Saptrishi Medical AI

Clinical product contributor | Product development and evaluation | 18 months, ongoing

- Helped develop the clinical requirements for a medical AI product that digitises laboratory reports, ECGs, treadmill tests, spirometry, and wearable records into a traceable longitudinal health profile.
- Contributed clinical logic and validation criteria for ECG and treadmill-data interpretation, including signal-quality checks, artefact flags, exercise-capacity trends, and comparison of automated findings with source traces and clinical context.
- Created de-identified longitudinal test cases and reviewed outputs for transcription errors, missing medication context, non-comparable measurements, interpretation discordance, and unsupported causal or diagnostic language.
- Designed human-in-the-loop safeguards requiring source provenance, uncertainty labels, separation of reported symptoms from objective measurements, and clinician verification before patient-facing recommendations.
- Translated longitudinal findings into clinically reviewed lifestyle, monitoring, and follow-up guidance; worked with a technical collaborator to improve report structure, evidence traceability, and artefact handling.
- Applied the product in an observational two-participant study and tracked subsequent activity, sleep, heart-rate, and functional trends using Google Health/Fitbit data. One participant's HbA1c declined from 6.90% to 5.80% between January and July 2026; the other reported walking 2 km without breathlessness.

Observed outcomes occurred alongside lifestyle support, medication exposure, and ongoing clinical care; they are not evidence of an independent AI treatment effect.

Professional experience

Senior Resident in Community Medicine | Oct 2026 - Present
SBKS MIRC, Sumandeep Vidyapeeth

- Supports field-practice supervision, clinical teaching, research, and public health programmes.

Junior Resident in Community Medicine | Oct 2023 - Oct 2026
SBKS MIRC, Sumandeep Vidyapeeth

- Combined rural, urban, and district patient care with epidemiology, biostatistics, and research; contributed household assessment, counselling, and follow-up through the Family Adoption Programme.

Clinical Doctor and Medical Officer | Aug 2022 - Aug 2023
Sterling Hospital, Gurukul, Ahmedabad

- Provided clinical care, documentation, patient coordination, and emergency-response support within multidisciplinary teams.

Rotatory Intern | May 2021 - May 2022
JSS Medical College, Mysore

- Completed hospital and community rotations, including adult medicine, paediatrics, emergency care, and COVID-19 care.

Education

MD Community Medicine | SBKS MIRC, Sumandeep Vidyapeeth | Oct 2023 - Oct 2026
MBBS | JSS Medical College, Mysore | Sep 2016 - May 2022

Relevant training

3rd Winter Epidemiology School, AIIMS Nagpur: regression analysis and quantitative bias analysis. Basic Course in Biomedical Research (BCBR).

Geriatric and population health research

- Contributed data curation, validation, investigation, and manuscript review to a study of 380 older adults with chronic illness, examining healthcare utilisation, follow-up, and financial burden.
- Co-authored qualitative research on post-pandemic healthcare-seeking, a study of 102 postmenopausal women, and a 415-student study of examination anxiety and coping.

Selected publications

Co-author of the following work. Published and accepted status shown for each.

1. Healthcare utilisation, routine healthcare follow-up, and financial burden among older adults with chronic illness in western India. *Clinical Epidemiology and Global Health. 2026;42:102486. Published.* doi:10.1016/j.cegh.2026.102486

2. Perceived changes in health-seeking behaviour following the COVID-19 pandemic: A qualitative study of urban and rural populations in eastern Gujarat. *Cureus. 2026;18(10):e117837. Published.* doi:10.7759/cureus.117837

3. Healthcare-seeking behavior and associated factors among postmenopausal women in rural and urban areas of eastern Gujarat: A community-based study. *Journal of Mid-life Health. 2026. Accepted.* doi:10.4103/jmh.jmh_121_26

4. Exam anxiety and coping strategies among undergraduate medical students: A cross-sectional study. *Journal of Education and Health Promotion. 2026. Accepted.* doi:10.4103/jehp.jehp_540_26

5. Geriatric health care in rural setting: A community-based case report of an older adult with hypertension. *International Journal of Community Medicine and Public Health. Accepted 27 Apr 2026.*
