Dr Srishti Mishra

MBBS | MD Community Medicine

Physician | Clinical AI Product Lead | Public Health Researcher

Ahmedabad, Gujarat, India | srshtm97@gmail.com | www.drsrishti.in

Professional summary

Physician and clinical AI product lead with 18 months of digital-health product development, combining patient care with public-health research. Led Saptrishi Medical AI's clinical design from concept to production with engineers and a psychologist, connecting interpretable health data to personalised guidance and measurable follow-up. Experience spans cardiac interpretation, metabolic and respiratory health, sleep wellness and non-invasive biomarkers. Four published papers and four accepted manuscripts.

Core skills

Clinical product development | AI evaluation | Cross-functional collaboration | Longitudinal health monitoring | Epidemiology and biostatistics | Behavioural and social determinants of health

Clinical AI and digital health experience

Saptrishi Medical AI

Clinical product lead | 18 months, ongoing

- Originated the clinical product and led its development into production with engineers and a psychologist. Connected laboratory, ECG/TMT and spirometry interpretation to personalised activity, lifestyle and follow-up guidance.
- Applied the workflow to cardiometabolic care: case follow-up documented HbA1c reduction from 6.90% to 5.80% (Jan-Jul 2026) and a peak reported treadmill workload of 9.6 METs (Nov 2025), versus an initial 5.6 METs (Apr 2024).
- Combined psychological guidance with Google Health/Fitbit follow-up for sleep wellness and anxiety-related symptoms. An individual case showed 23.2% lower mean device-recorded restlessness across 33 baseline and 20 follow-up nights.
- Supported personalised breathing and graded-activity guidance in asthma follow-up. The patient reported brisk walking of 2 km without breathlessness and non-use of scheduled respiratory medication, with intermittent inhaler use; reviewed treatment tolerability and medication history.

Mathematical ECG and treadmill interpretation

- Led the clinical design of a quantitative cardiac interpretation workflow with engineers, deriving heart-rate recovery, rate-pressure product and exercise-capacity comparisons from extracted measurements and explicit, reference-based equations.
- Made results auditable through source-page references, units, formulas and calibration checks. Defined artefact flags and clinician-review checkpoints; deterministic calculations were covered by automated tests using controlled inputs.

Non-invasive haemoglobin estimation

Clinical evaluation lead | Exploratory feasibility study

Led clinical development and feasibility testing of an experimental non-invasive approach to haemoglobin estimation using lip- and tongue-image biomarkers. Evaluated 79 paired observations, including gynaecology-sourced samples, using patient-grouped validation and capture-day testing. Designed a prospective 150-adult study to compare estimates with same-day blood counts and assess performance across demographic groups, advancing the project towards evaluation for early anaemia screening.

Professional experience

Senior Resident in Community Medicine | Oct 2026 - Present
SBKS MIRC, Sumandeep Vidyapeeth

- Supports field-practice supervision, clinical teaching, research, and public health programmes.

Junior Resident in Community Medicine | Oct 2023 - Oct 2026
SBKS MIRC, Sumandeep Vidyapeeth

- Combined rural, urban, and district patient care with epidemiology, biostatistics, and research; contributed household assessment, counselling, and follow-up through the Family Adoption Programme.

Clinical Doctor and Medical Officer | Aug 2022 - Aug 2023
Sterling Hospital, Gurukul, Ahmedabad

- Provided clinical care, documentation, patient coordination, and emergency-response support within multidisciplinary teams.

Rotatory Intern | May 2021 - May 2022
JSS Medical College, Mysore

- Completed hospital and community rotations, including adult medicine, paediatrics, emergency care, and COVID-19 care.

Education

MD Community Medicine | SBKS MIRC, Sumandeep Vidyapeeth | Oct 2023 - Oct 2026
MBBS | JSS Medical College, Mysore | Sep 2016 - May 2022

Relevant training

3rd Winter Epidemiology School, AIIMS Nagpur: regression analysis and quantitative bias analysis. Basic Course in Biomedical Research (BCBR).

Population health research

- Contributed to research involving 380 older adults with chronic illness, examining healthcare use, follow-up and financial burden.
- Co-authored research involving 102 postmenopausal women in rural and urban settings, alongside qualitative work on post-pandemic healthcare-seeking behaviour.

Selected publications

Co-author of the following work. Published and accepted status shown for each.

1. Healthcare utilisation, routine healthcare follow-up, and financial burden among older adults with chronic illness in western India. *Clinical Epidemiology and Global Health. 2026;42:102486. Published.* doi:10.1016/j.cegh.2026.102486

2. Perceived changes in health-seeking behaviour following the COVID-19 pandemic: A qualitative study of urban and rural populations in eastern Gujarat. *Cureus. 2026;18(10):e117837. Published.* doi:10.7759/cureus.117837

3. Healthcare-seeking behavior and associated factors among postmenopausal women in rural and urban areas of eastern Gujarat: A community-based study. *Journal of Mid-life Health. 2026. Accepted.* doi:10.4103/jmh.jmh_121_26

4. Geriatric health care in rural setting: A community-based case report of an older adult with hypertension. *International Journal of Community Medicine and Public Health. Accepted 27 Apr 2026.*
