Dr Srishti Mishra

MBBS | MD Community Medicine

Community Medicine Physician | Clinical AI and Digital Health | Epidemiology

Ahmedabad, Gujarat, India | srshtm97@gmail.com | www.drsrishti.in

Professional summary

MD Community Medicine physician with patient-care experience since 2021 and 18 months of clinical AI and digital health evaluation experience. Applies clinical evidence, epidemiology, behavioural context, and social determinants of health to product requirements, output validation, error analysis, and human-in-the-loop review. Research includes older adults with chronic illness, healthcare-seeking behaviour, and geriatric care. Four published papers and four accepted manuscripts.

Core skills

Clinical AI product evaluation; model-output validation; clinical product requirements; human-in-the-loop review; error and artefact analysis; clinical safety boundaries; longitudinal health data; epidemiology and biostatistics; qualitative research; social determinants of health; data curation and validation; patient communication.

Clinical AI and digital health experience

Clinical evaluation of an AI-assisted longitudinal health workflow

Independent project | Clinical evaluation contributor | 18 months, ongoing

- Defined clinical review criteria for a workflow that converts laboratory, ECG, treadmill, spirometry, and Google Health/Fitbit records into longitudinal summaries for cardiometabolic and respiratory follow-up.
- Created de-identified longitudinal test cases and compared AI outputs with source reports, clinical history, medication exposure, and clinician interpretations rather than accepting generated summaries at face value.
- Documented failure modes including ECG motion artefacts, automated-versus-clinical interpretation discordance, missing medication context, non-comparable serial measurements, and unsupported causal language.
- Specified human-in-the-loop safeguards: preserve source provenance, flag low-quality inputs, separate reported symptoms from objective measurements, communicate uncertainty, and require clinical review before patient-facing use.
- Translated clinical findings into reporting requirements and worked with a technical collaborator to improve output structure, evidence traceability, artefact handling, and clinically appropriate language.
- Used the workflow during follow-up of two adults. One participant's HbA1c declined from 6.90% to 5.80% between January and July 2026; the other reported walking 2 km without breathlessness. Outcomes were interpreted alongside lifestyle support and ongoing care, not as an independent AI treatment effect.

Professional experience

Senior Resident in Community Medicine | Oct 2026 - Present
SBKS MIRC, Sumandeep Vidyapeeth

- Supports field-practice supervision, clinical teaching, research, and public health programmes.

Junior Resident in Community Medicine | Oct 2023 - Oct 2026
SBKS MIRC, Sumandeep Vidyapeeth

- Combined rural, urban, and district patient care with epidemiology, biostatistics, and research; contributed household assessment, counselling, and follow-up through the Family Adoption Programme.

Clinical Doctor and Medical Officer | Aug 2022 - Aug 2023
Sterling Hospital, Gurukul, Ahmedabad

- Provided clinical care, documentation, patient coordination, and emergency-response support within multidisciplinary teams.

Rotatory Intern | May 2021 - May 2022
JSS Medical College, Mysore

- Completed hospital and community rotations, including adult medicine, paediatrics, emergency care, and COVID-19 care.

Education

MD Community Medicine | SBKS MIRC, Sumandeep Vidyapeeth | Oct 2023 - Oct 2026
MBBS | JSS Medical College, Mysore | Sep 2016 - May 2022

Relevant training

3rd Winter Epidemiology School, AIIMS Nagpur: regression analysis and quantitative bias analysis. Basic Course in Biomedical Research (BCBR).

Geriatric and population health research

- Contributed data curation, validation, investigation, and manuscript review to a study of 380 older adults with chronic illness, examining healthcare utilisation, follow-up, and financial burden.
- Co-authored qualitative research on post-pandemic healthcare-seeking, a study of 102 postmenopausal women, and a 415-student study of examination anxiety and coping.

Selected publications

Co-author of the following work. Published and accepted status shown for each.

1. Healthcare utilisation, routine healthcare follow-up, and financial burden among older adults with chronic illness in western India. *Clinical Epidemiology and Global Health. 2026;42:102486. Published.* doi:10.1016/j.cegh.2026.102486

2. Perceived changes in health-seeking behaviour following the COVID-19 pandemic: A qualitative study of urban and rural populations in eastern Gujarat. *Cureus. 2026;18(10):e117837. Published.* doi:10.7759/cureus.117837

3. Healthcare-seeking behavior and associated factors among postmenopausal women in rural and urban areas of eastern Gujarat: A community-based study. *Journal of Mid-life Health. 2026. Accepted.* doi:10.4103/jmh.jmh_121_26

4. Exam anxiety and coping strategies among undergraduate medical students: A cross-sectional study. *Journal of Education and Health Promotion. 2026. Accepted.* doi:10.4103/jehp.jehp_540_26

5. Geriatric health care in rural setting: A community-based case report of an older adult with hypertension. *International Journal of Community Medicine and Public Health. Accepted 27 Apr 2026.*
